

Municipal Profile

The Municipal Profile gives an overview of each municipality which can help interpret other indicators such as the Financial Condition Index. This overview includes data about sources of revenue, where a municipality spends their budget, and changes in population and age profile over time. It also includes other demographic information, such as; household income, education, and employment participation in the municipality.

For Towns and Rural Municipalities the average for all municipalities of that type are shown on the right. This additional data helps compare the selected community with the data for similar communities.
